

CESAR SANCHEZ

Corpus Christi, TX | 817-405-5717 | sanchezcesar106@gmail.com

PROFESSIONAL SUMMARY

Business student with a professional background in nutrition and fitness coaching, where two years of client work built a practiced ability to translate complex, technical information for non-technical audiences. More recently, applied that same skill to AI product development — independently scoping, directing, and shipping an AI-powered application from concept through monetization. Certified in Anthropic's AI Fluency and Claude 101.

CORE SKILLS

- AI/Product: Prompt engineering, directing AI-assisted development, product scoping, PRD writing
- Data & Tools: Python, SQL, Tableau, Excel, Microsoft Access/VBA
- Platforms: Base44, Claude (vision API), React frontend basics
- Coaching & Enablement: Client/staff training, behavior-change coaching, real-time adaptation

PROJECT EXPERIENCE

NutriCook — AI-Powered Meal Planning App Dec 2025 – Present

- Scoped, designed, and shipped an AI meal-planning app end-to-end using Base44, a React frontend, and Claude's vision API — directing AI-assisted development through prompt engineering rather than hand-coding
- Wrote a full PRD covering feature scope, user flows, and a freemium/Stripe monetization model
- Can speak honestly to what worked, what didn't, and what I'd scope differently on a rebuild

Animal Diet & Nutrition Tracking Database, Texas State Aquarium Jan – Apr 2026

- Discovered and scoped a data-tracking need with aquarium staff, then built a Microsoft Access database with VBA interfaces to solve it — an outside org, real stakeholders, real constraints

PROFESSIONAL EXPERIENCE

Nutrition Program Lead | Texas A&M University–Corpus Christi Jun 2025 – Present

- Trained and enabled 3 staff members to run coaching workflows independently, handing off ownership rather than staying the bottleneck
- Analyzed client data to scope and personalize nutrition strategies across multiple clients
- Built and managed an Excel inventory system (50+ items), improving weekly operations

Group Fitness Instructor Aug 2024 – Present

- Taught and adapted structured programming in real time for groups up to 20, reading whether instruction was landing and adjusting on the spot

Personal Trainer Dec 2023 – Present

- Built individualized programs from assessment data; translated technical fitness concepts into plans clients without a fitness background could actually follow

LEADERSHIP

Program Development & Coaching Operations | TAMUCC Fitness & Wellness Aug 2025 – Present

- Standardized workflows across a small team wearing multiple hats; reduced onboarding time for new staff by documenting and handing off process ownership

Public Relations Officer | Data Analytics Technology Association Aug 2023 – Jul 2024

- Managed outreach and communications for a student organization with limited resources

EDUCATION

BBA, Finance; BBA, Business Analytics & Information Systems Expected Spring 2027

Texas A&M University–Corpus Christi

CERTIFICATIONS

- Anthropic — AI Fluency: Framework & Foundations (2026)
- Anthropic — Claude 101 (2026)
- Anthropic — Claude Code 101 (2026)
- Coursera — Machine Learning
- LinkedIn Learning — Tableau Essentials, SAP Analytics Cloud
- Google AI Essentials (in progress)
- GitHub Foundations (in progress)
- Texas Department of Insurance — Licensed Broker (2026–2028)
